TRANSMITTAL OF SUPPLEMENTAL INFORMATION
DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing supplementary information from the European search report under Article 157(2)(a) EPC, which has come to the attention of applicants and/or their attorneys has not already been submitted in the present patent application, and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56.

Neither applicants nor their attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08a "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08a, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON ENGLISH INFORMATION

1. PCT International Patent Application No. WO 99/04952, published February 4, 1999 discloses: The invention concerns a quick and inexpensive method for making parts of large dimensions, formed by a skin (10) and reinforcing elements (12, 16), such as an aircraft fuselage sections, in composite material with thermoplastic matrix. After the reinforcing elements have been manufactured separately by drape moulding, consolidating and forming, they are placed on an equipment (23) where the skin (10) is simultaneously manufactured and assembled with the reinforcing elements (12, 16) by diffusion welding. More precisely, the skin (10) is continuously draped and consolidated by the drape moulding head (36), such that the required part is directly obtained.

2. German Patent Application No. DE 37 07 634 published July 7, 1988 discloses: In a device for producing a heat-curable plastic body by compression moulding in a mould cavity by means of an elastically deformable mould core acting by expansion pressure on the plastic, said mould core is a foam body expanded by injected compressed air so that it can be designed with undersize.

CERTIFICATION UNDER 37 C.F.R. § 1.97(e)

I hereby certify that each item of information listed on the enclosed Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this Information Disclosure Statement.

Respectfully submitted,

Craig Metcalf
